### Your guide to the ratings for each individual unit class:

- ★★★★ Has consistently demonstrated strong value           ★★ Has demonstrated value, although not consistently
- ★★★ Has demonstrated value           ★ Has not demonstrated value

### What have we concluded?

The Board has concluded that this fund has demonstrated value for investors in all unit classes. Whilst performance has been challenged, we continue to believe that this strategy can deliver on its investment objectives. To help achieve this, we appointed a locally based manager, Ping An, in 2021 and are monitoring the transition closely in anticipation of good outcomes for our clients. Furthermore, Jupiter regularly reviews all aspects of the products and services which it provides, to continuously improve its offering to investors, and will report on any such initiatives in future Value Assessments.

### The Assessment of Value for your Fund

For more information about this report, and how we have evaluated each component of value click: [here](#)

#### Investment Objective

To provide a return, net of fees, higher than that provided by the MSCI China Index over the long term (at least five years).

#### Fund Performance

All unit class returns trailed those of the benchmark, at the time of the assessment, and therefore did not meet the investment objective.

The high-conviction approach to stock and sector selection did not generate returns above those of its benchmark, primarily due to a higher allocation to smaller-sized stocks. The prevalent market conditions over the past five years have seen the largest index constituents within China enjoy an unprecedented period of outperformance over those with less scale. The benchmark's returns have been dominated by large/mega-cap growth technology companies and, while there have been periods where holding a smaller percentage in certain stocks has had a positive impact, in aggregate they have hampered relative returns. More recently however, the recovery from China's 2022 covid-induced lockdowns has benefitted the fund's small and mid-cap names that is holds as part of its broader portfolio.

The investment senior management team continues to monitor the fund following the appointment, in 2021, of locally based Ping An of China Asset Management, who have long-standing Chinese equities investment expertise. The Board also fulfils an oversight role with regular investment updates provided by the senior management team, and we

are monitoring the transition closely and anticipate good outcomes for clients as a result of this change.

#### Quality of Service

The services we provide to manage, operate, and administer the fund were evaluated as part of the 2023 Value Assessment, and have demonstrated a high quality of service over the period of review.

#### Costs of the Authorised Fund Manager (AFM)

We have evaluated the costs borne by the AFM for providing services to the fund and concluded that these are fair and reasonable in respect of providing investment, operational and administrative services.

#### Economies of Scale

We have found that the majority of costs within Jupiter, specific to the management of investors' assets, vary with the level of assets held in a particular fund and do not indicate economies of scale attributable to individual funds. However, it is possible that economies of scale may be realised by the Group within the fixed costs it incurs. We have reviewed, for each fund, the amount of these fixed costs, the level of assets, and how these have increased or decreased during the year to identify if any economies were realised by the firm. The outcome of this year's assessment does not currently indicate economies of scale attributable to individual products that can be shared with investors.

#### Comparable Market Rates

We analysed the extent to which the fund has comparable market rates when compared with an appropriate peer group and concluded that the fees for the I and J unit classes were in the low end and judged to be appropriate and L unit

classes was in the median, and judged to be appropriate. This is in the context of our value and service proposition as an active, high-conviction investment manager and the opportunities we seek to provide for our investors.

### Comparable Services

We have found that there are currently no Comparable Services for the fund or other products that Jupiter Group provides.

### Class of Units or Shares

Having assessed the classes of units available in the fund, we have concluded that investors currently can and do access the fund through the most appropriate unit class available to them.
