

Value Statement for year ending 31 March 2023

The outcomes for Jupiter Multi-Asset Income & Growth Fund - by individual unit class:

- I - Unit Class ★★★ Has demonstrated value
- J - Unit Class ★★★ Has demonstrated value
- L - Unit Class ★★ Has demonstrated value, although not consistently

Your guide to the ratings for each individual unit class:

- ★★★★ Has consistently demonstrated strong value ★★ Has demonstrated value, although not consistently
- ★★★ Has demonstrated value ★ Has not demonstrated value

What have we concluded?

The Board has concluded that this fund has demonstrated value for investors in the I and J unit classes and has demonstrated value, although not consistently, for investors invested in the L unit class. While the fund has not grown capital over the period in the J and L unit classes, at the time of assessment, it has achieved other the other key elements of its investment objective. The fund has also benefited from the appointment of our established Merlin Team, as well as a fundamental enhancement to the investment approach. We believe these changes will make the fund well placed to deliver strong investment performance going forward. Furthermore, Jupiter regularly reviews all aspects of the products and services which it provides, to continuously improve its offering to investors and will report on any such initiatives in future Value Assessments.

The Assessment of Value for your Fund

Investment Objective

To provide income and capital growth over the long term (at least five years)

Fund Performance

At the time of assessment all unit classes trailed both the fund's comparator benchmarks, a composite benchmark made up of 25% FTSE All-Share, 50% MSCI World, 12.5% ICE BAML Global High Yield Bond index, 12.5% ICE BAML Global Corporate Index (hedged to GBP) and the IA Mixed Investment 40-85% Shares over five years, with only the I class generating capital growth over the period. All unit classes did, however, provide income to partly meet their investment objective. The fees for the J and L unit class are higher, since they reflect additional fee components to cover investor servicing activity and, in the case of the L class, intermediary remuneration, as agreed when the units were purchased. The higher fees impacted on the J and L class returns and they both missed providing capital growth over the period in review, by a small margin. Under new management by the established Jupiter Merlin Independent Funds team from 1st November 2022, performance has improved.

Since being transferred in November, the fund has been rebranded to Jupiter Merlin Income and Growth Select and has been significantly restructured in line with the existing Merlin funds. It is investing globally across a range of equities

(stocks), bonds (loans to companies and/or governments) and commodities (e.g., Gold). While markets have swung between favouring 'growth' and 'value' equity styles, the fund now has a deliberate exposure to both 'styles' – with the aim of avoiding the traps inherent in chasing market momentum.

In the period encompassed by the effects of two external, global shocks, one being the aftermath of the pandemic, the other an international conflict whose epicentre is Ukraine, the fund's strong absolute and sector-relative performance in challenging markets over the past 12 months, suggests this new steady-as-we-go approach has been appropriate.

Jupiter invests over the long-term and we are confident that the change of fund management team, established investment expertise and robust investment process can deliver good performance outcomes for our clients in the future. The Board fulfils an oversight role with regular investment updates provided by the senior management team, and we will continue to monitor the impact of changes made during the period and provide an update in our next value statement.

Quality of Service

The services we provide to manage, operate, and administer the fund were evaluated as part of the 2023 Value Assessment, and have demonstrated a high quality of service over the period of review.

Costs of the Authorised Fund Manager (AFM)

We have evaluated the costs borne by the AFM for providing services to the fund and concluded that these are fair and reasonable in respect of providing investment, operational and administrative services.

Economies of Scale

We have found that the majority of costs within Jupiter, specific to the management of investors' assets, vary with the level of assets held in a particular fund and do not indicate economies of scale attributable to individual funds. However, it is possible that economies of scale may be realised by the Group within the fixed costs it incurs. We have reviewed, for each fund, the amount of these fixed costs, the level of assets, and how these have increased or decreased during the year to identify if any economies were realised by the firm. The outcome of this year's assessment does not currently indicate economies of scale attributable to individual products that can be shared with investors.

Comparable Market Rates

We analysed the extent to which the fund has comparable market rates when compared with an appropriate peer group and concluded that the fees for the I and J unit classes were median and were judged to be appropriate. The fees for the L unit class were moderately high but were judged to be, on balance, appropriate. This is in the context of our value and service proposition as an active, high-conviction investment manager and the opportunities we seek to provide for our investors.

Comparable Services

We have found that there are currently no Comparable Services for the fund or other products that Jupiter Group provides.

Class of Units or Shares

Having assessed the classes of units available in the fund, we have concluded that investors currently can and do access the fund through the most appropriate unit class available to them.
