M&G (Lux) Income Allocation Fund

a sub-fund of M&G (Lux) Investment Funds 1

EUR Class A – Accumulation shares ISIN no. LU1582984818

Managed by M&G Luxembourg S.A.

Objective and investment policy

The Fund aims to provide:

- a growing income over any three-year period; and
- capital growth of 2-4% on average per year over any three-year period, while applying the ESG Criteria.

Core investment: the Fund typically invests directly in a mix of income-generating assets, including cash (meaning eligible deposits) and assets that can be turned quickly into cash, from anywhere in the world and denominated in any currency, within the following allocation ranges:

- 40-80% in fixed income securities (including bonds and asset-backed securities)
- 10-50% in company shares
- 0-20% in other assets (including convertibles and contingent convertible debt securities)

The Fund may also invest in these assets via derivatives or through other funds. The Fund may invest in China A-Shares and in Chinese bonds denominated in renminbi. The Fund may invest up to 40% in lower quality bonds. A minimum of 70% of the Fund is in euro or hedged back to euro. The Fund invests in securities that meet the ESG Criteria, applying an Exclusionary Approach as described in the precontractual annex.

Other investments: the Fund may invest up to 10% in asset-backed securities, up to 5% in contingent convertible debt securities and in other funds.

Derivatives usage: for investment purposes and to reduce risk and cost.

Strategy in brief:

• Investment approach: the Fund is actively managed with a highly flexible investment approach. The investment manager has the freedom to allocate capital between different types of assets in response to changes in economic conditions and asset prices. The approach combines in-depth research to work out the 'fair' value of assets over the medium to long term, with analysis of the market's short-term reactions to events, to identify investment opportunities. The Fund seeks to manage risk by investing globally across multiple asset classes, sectors, currencies and countries. Where the investment manager believes opportunities are limited to a few areas, the portfolio may be very concentrated in certain assets or markets. The investment manager normally seeks to hold at least 70% of the Fund in euros.

• Investment manager's ESG classification: Planet+ / ESG Enhanced, as defined in the Fund's Prospectus.

Benchmark: the Fund is actively managed and it has no benchmark. Investors can assess the performance of the Fund by its objective to provide a growing level of income and capital growth of 2-4% per annum, both measured over any three-year period.

Risk and reward profile

■ The above risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of this share class. This Share Class is categorised in risk class 4 because its Net Asset Value has shown medium rises and falls in value historically.

■ The risk number shown is not guaranteed and may change over time.

■ The lowest risk number does not mean risk free.

The main risks that could affect performance are set out below:

■ The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

■ Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

■ The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.

■ Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

■ The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund may lose as much as or more than the amount invested.

■ Investments in assets from China are subject to changeable political, regulatory and economic conditions, which may cause difficulties when buying, selling or collecting income from these investments. In addition, such investments made via the 'Stock Connect' system or traded on the China Interbank Bond Market, may be more susceptible to clearing, settlement and counterparty risk. These factors could cause the fund to incur a loss.

■ In exceptional circumstances where assets cannot be fairly valued, or have to be sold at a large discount to raise cash, we may temporarily suspend the fund in the best interest of all investors.

■ The fund could lose money if a counterparty with which it does business becomes unwilling or unable to repay money owed to the fund.

■ Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.

■ ESG information from third-party data providers may be incomplete, inaccurate or unavailable. There is a risk that the investment manager may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the portfolio of the fund.

■ The investment policy for a Fund may exclude potential investments where they do not meet certain criteria (e.g. financial criteria such as minimum credit ratings, or non-financial criteria such as ESG screens). This may cause the Fund to perform differently compared to similar funds that are permitted to invest in those investments.

Charges

The charges shown in the table are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

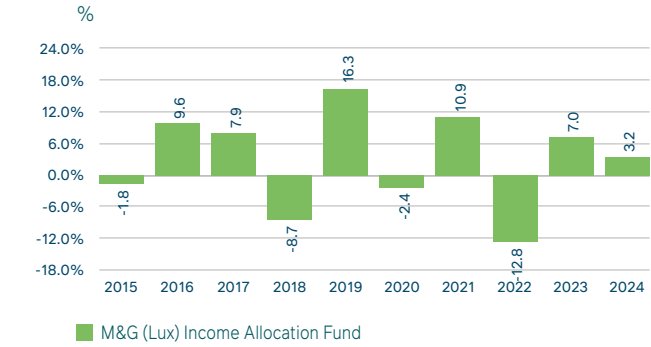

One-off charges taken before or after you invest	
Entry charge	4,00%
Exit charge	0,00%
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	1,78%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are the maximum figures and, in some cases, you may pay less. You can find out the exact charges which apply to your investment by contacting your financial adviser or distributor or, if you have invested directly with us, you can contact us using the details given in the practical information section.

The ongoing charge is based on expenses for the period/year ending 31 March 2024. This figure may change from year to year. It excludes portfolio transaction costs.
