

# M&G (Lux) Optimal Income Fund

EUR Class A – Accumulation shares

Monthly Fund Review as at 31 July 2025

Marketing Communication - for Professional Investors only

## Highlights

- Despite tariffs continuing to dominate headlines, financial markets remained relatively subdued in July. Interest rates saw a marginal increase, while credit spreads compressed further, supported by encouraging economic data.
- We continue to maintain a long position in duration; as curves have steepened this year, we have been actively seeking opportunities to increase our exposure to longer-dated bonds. Within this area, we have favoured US bonds over UK bonds, where we typically prefer shorter-dated instruments.
- We capitalised on recent market strength to reduce our exposure to investment grade corporate bonds. Our primary focus has been on European credit, as this market has experienced the most spread compression and now appears expensive compared to others. We further decreased our high yield (HY) exposure, primarily through reducing our allocation to the EUR HY CDS index. We also divested from certain US airline bonds acquired in April, following the tariff volatility. At present, our HY exposure stands at 8.5% vs a neutral position of 33.3%.

## The main risks associated with this fund

The value and income from the fund's assets will go down as well as up. This will cause the value of your investment to fall as well as rise. There is no guarantee that the fund will achieve its objective and you may get back less than you originally invested.

Investments in bonds are affected by interest rates, inflation and credit ratings. It is possible that bond issuers will not pay interest or return the capital. All of these events can reduce the value of bonds held by the fund.

High yield bonds usually carry greater risk that the bond issuers may not be able to pay interest or return the capital.

The fund may use derivatives to profit from an expected rise or fall in the value of an asset. Should the asset's value vary in an unexpected way, the fund will incur a loss. The fund's use of derivatives may be extensive and exceed the value of its assets (leverage). This has the effect of magnifying the size of losses and gains, resulting in greater fluctuations in the value of the fund.

Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries.

The fund is exposed to different currencies. Derivatives are used to minimise, but may not always eliminate, the impact of movements in currency exchange rates.

Investing in this fund means acquiring units or shares in a fund, and not in a given underlying asset such as building or shares of a company, as these are only the underlying assets owned by the fund.

ESG information from third-party data providers may be incomplete, inaccurate or unavailable. There is a risk that the investment manager may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the portfolio of the fund.

Further risk factors that apply to the fund can be found in the fund's Prospectus.

<sup>1</sup>Manager tenure' includes the period when managing an equivalent UK-authorized OEIC. Please see 'Important information' at the end of this document for further details.

<sup>1</sup>See important information section for explanation of average credit rating methodology.

The yield-to-maturity (YTM) figure shown here is calculated on a monthly basis. It shows the weighted average long term total yield of all the instruments held by the fund, assuming that all coupon payments are made - and reinvested at the same rate as the bond's current yield - and all principal payments are made. The figure is expressed as an annual rate.

The yield-to-worst (YTW) figure shown here is calculated on a monthly basis. This is a measure of the lowest potential weighted average yield of the instruments held in the fund. This metric can be used to evaluate the worst-case scenario for yield at the earliest allowable retirement date of the bonds held. This figure will be less than the YTM given the shortened investment horizon. The figure is expressed as an annual rate.

The chart above shows the fund performance vs the benchmark performance from the closest month-end to the introduction of the benchmark.

**Benchmark:** Until 24 August 2021 the name of the benchmark was 1/3 Bloomberg Barclays Global Aggregate Corporate Index EUR Hedged, 1/3 Bloomberg Barclays Global High Yield Index EUR Hedged, 1/3 Bloomberg Barclays Global Treasury Index EUR Hedged. The benchmark is a comparator against which the fund's performance can be measured. The composite index has been chosen as the fund's benchmark as it best reflects the scope of the fund's investment policy. The benchmark is used solely to measure the fund's performance and does not constrain the fund's portfolio construction.

The fund is actively managed. The investment manager has complete freedom in choosing which investments to buy, hold and sell in the fund. The fund's holdings may deviate significantly from the benchmark's constituents. The benchmark is not an ESG benchmark and is not consistent with the ESG Criteria.

Fund performance prior to 7 September 2018 is that of the EUR Class A-H Accumulation of the M&G Optimal Income Fund (a UK-authorized OEIC), which merged into this fund on 8 March 2019. Tax rates and charges may differ.

The composite index was introduced as the fund's benchmark on 7 September 2018.

**Source:** Morningstar, Inc and M&G, as at 31 July 2025. Returns are calculated on a price to price basis with income reinvested. Performance data does not take account of the commissions and costs that may incur on the issue and redemption of units. Benchmark returns stated in EUR terms.

A mid-average credit rating for each security, where available from S&P, Fitch, Moody's, is calculated. Where a security has not been rated by S&P, Fitch or Moody's, we may use M&G's internal credit rating. Ratings should not be taken as a recommendation.

Management fees and other administrative or operating costs figures disclosed above include direct costs to the fund, such as the annual management charge (AMC), administration charge and custodian charge, as well as portfolio transaction costs. They are based on expenses for the period ending 31 March 2025. Any ongoing costs figure with\* indicates an estimate. Not all costs are presented. The fund's annual report for each financial year will include details of the exact charges. Please note that not all of the share classes listed above might be available in your country. Please see the 'Important information' at the end of this document, the fund's Prospectus and the KID for more information on the risks associated with this fund and which share classes are available for which product and which investor type.

Source: We use a variety of data sources to gather and map the carbon emissions of our funds. This allows for data gaps from some data providers on some issuers. We currently use MSCI as our main third-party data provider for carbon intensity data as we consider its coverage to be the broadest of the current providers.

Exposure to ESG Bonds

ESG Standard Glossary

**Additional ESG specifications:** In the context of M&G, these are funds that are managed in accordance with specific ESG criteria or, where relevant, with an explicit ESG objective. They will have a number of minimum exclusions in place.

**Engagement:** Interaction with company management on various financial and non-financial, including ESG, issues. Engagement allows investors to better understand how a company is undertaking its operations and how it is interacting with its stakeholders, as well as advising on and influencing company behaviour and disclosures where appropriate.

**ESG integration:** Describes the explicit and systematic inclusion of Environmental, Social and Governance factors in investment analysis and investment decisions. It underpins a responsible investment approach, and allows investors to better manage risk and generate sustainable, long-term returns.

**Exclusions:** The exclusion or restriction of investments based on the sector in which they operate, the products or services they provide or for other specific criteria, i.e. they are deemed to be in breach of the United Nations Global Compact principles on human rights, labour the environment and anti-corruption.

**Voting:** As the partial owners of a company, shareholders have the right to vote on resolutions put forward at a company's annual general meeting. These resolutions include the re-election of directors, executive remuneration and business strategy, among others, and may include resolutions put forward by shareholders.

Explanation of our climate metrics

The Weighted Average Carbon Intensity (WACI) is the metric used to report our funds' carbon emissions. It is a measure of how much CO2 is being emitted per US\$ million of sales by each company that the fund invests in. This can be used to determine the likely effect a company is having on the environment. It can also help to compare the impact different companies have on the environment, and to compare companies against the broad market or the financial benchmark for the fund. However, this metric does not take into account the difference in carbon characteristics among sectors.

The WACI metric is one of many greenhouse gas emissions data points, each offering a different aspect of analysis on climate impact. M&G have selected this metric as it is applicable to multi-asset, equity and fixed income funds and it is aligned to the recommendations from the Taskforce for Climate Related Financial Disclosures (TCFD). It has also been chosen to align with M&G's groupwide target of transparency when it comes to the disclosure of climate emissions.

For the avoidance of doubt, this fund is not managed to a carbon emission objective and, the benchmark WACI (should funds have a benchmark) has been included for information purposes only.

Explanation of other sustainability indicators

More sustainable, better run and less harmful businesses – MSCI Analysis

The 'MSCI analysis' table shows the weighted average ESG score of the portfolio using MSCI, compared to either the fund's benchmark or to the named index, as indicated in the fund's Prospectus.

The 'Exposure to ESG bonds' table shows the percentage of the portfolio invested in ESG bonds, such as green bonds, social bonds, transition bonds, sustainability bonds or sustainability linked bonds.

## Fund description

The fund aims to provide a combination of capital growth and income to deliver a return based on exposure to optimal income streams in investment markets, while applying environmental, social and governance (ESG) criteria. It seeks to make these investments using an exclusionary approach, as described in the prospectus. Typically, at least 50% of the portfolio is invested in a broad range of fixed income securities of any credit quality and from any country, including emerging markets, and denominated in any currency. The fund manager selects investments wherever he sees the greatest opportunities, based on his assessment of a combination of macroeconomic, asset, sector and stock-level factors. The manager may also hold up to 20% of the portfolio in company shares when he believes they offer better value than bonds. The fund's recommended holding period is five years. In normal market conditions, the fund's expected average leverage – how much it can increase its investment position by borrowing money or using derivatives – is 200% of its net asset value.

## Glossary

Please find a link to our [glossary page](#) which provides an explanation of terms used in this document across our fund ranges.

## Important information

On 8 March 2019 the non-sterling assets of the M&G Optimal Income Fund, a UK-authorised OEIC which launched on 8 December 2006, merged into the M&G (Lux) Optimal Income Fund, a Luxembourg-authorised SICAV, which launched on 5 September 2018. The SICAV is run by the same fund manager, applying the same investment strategy, as the OEIC. Past performance is no indication of current or future performance. The performance data does not take into account of commissions and costs incurred on the issue and redemption of units.

For the avoidance of doubt, for fixed income funds, we count different entities belonging to the same company as separate issuers to arrive at the number of issuers in the fund, as shown under the key information section.<sup>1</sup>The fund's average credit rating uses a mid-average rating (S&P, Fitch, Moody's or M&G's internal rating if no rating is available from these ratings agencies) of securities held by the fund. It excludes some derivatives that are used for efficient portfolio management only. Ratings should not be taken as a recommendation.

The M&G (Lux) Optimal Income Fund is a sub-fund of M&G (Lux) Investment Funds 1.

The Morningstar Medalist Rating™. © 2025 Morningstar. All Rights Reserved. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Ratings should not be taken as recommendation.

The Morningstar Overall Rating based on the fund's Euro Class A shares. Copyright © 2025 Morningstar UK Limited. All Rights Reserved. Ratings should not be taken as recommendation.

**Distribution of this document in or from Switzerland is not permissible with the exception of the distribution to Qualified Investors according to the Swiss Collective Investment Schemes Act ("Qualified Investors"). Supplied for the use by the initial recipient (provided it is a Qualified Investor) only.**

The collective investment schemes referred to in this document (the "Schemes") are open-ended investment companies with variable capital, incorporated in Luxembourg. The Instrument of Incorporation, Prospectus, Key Information Document, as well as the annual or interim Investment Report and Financial Statements can be obtained free of charge in English from M&G International Investments Switzerland AG, Zollstrasse 17, 8005 Zürich or from Société Générale, Paris, Zurich Branch, Talacker 50, P.O. Box 5070, 8021 Zurich, which acts as the Swiss representative of the Schemes (the "Swiss Representative") and acts as their Swiss paying agent.

**Before subscribing investors should read the Key Information Document and the Prospectus**, which includes a description of the investment risks relating to these funds. M&G Luxembourg S.A. may terminate arrangements for marketing under the new Cross-Border Distribution Directive denotification process.

Complaints handling information and summary of investors' rights are available in English from <https://www.mandg.com/investments/professional-investor/en-ch/footer/complaints-process>

This financial promotion is issued by M&G Luxembourg S.A. Registered Office: 16, boulevard Royal, L-2449, Luxembourg.
